Fact Sheet: EcoDigest™

EcoDigest is a blend of selected strains of *Bacillus subtilis*, *B. laterosporus*, *Lactobacillus sp.*, essential minerals, organic acids and vitamins.

EcoDigest works through diverse mechanisms:

- Produces digestive enzymes that improve digestion of live feeds and artificial diets.
- Produces essential nutrients that can be deficient or not balanced in the provided diet.
- Out competes deleterious microbes in the digestive system.

EcoDigest can be sprayed on top of the feed added to aquatic and land animals at a dose of 0.5 ml/ lb (1 ml/ kilogram). EcoDigest can also be dissolved in the drinking water provided to land animals at a dose between 0.4 to 4 ml/ gallon (0.1 to 1 ml/ liter).
